DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-9 and 21-25 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The claims are directed to method or process or apparatus for performing a complex multiplication via a mathematical algorithm to produce a complex product or multiplication result. The claims are not limited to a practical application of the mathematical algorithm because the multiplication result is not a useful, concrete and tangible result. More specifically the multiplication result is not a tangible result because it is not a real-world result. Claim 21, a means for claim, is an attempt to cover all practical ways of performing the mathematical algorithm.

Allowable Subject Matter

2. Claims 10-20 are allowed.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
